and streams. Although, the applicant has proposed several environmentally friendly features such as permeable pavers and rain gardens which will allow recharge, WQD recommends that additional infiltration devices (e.g., more permeable pavers) should be incorporated, if possible, to allow more runoff to enter the subsurface.

Please be advised that the scope of this review only addresses regulatory issues related to wetlands; this is not a review for storm water management or other regulatory compliance.

If we can be of further assistance, please feel free to contact me at (202) 535-2990.

Sincerely,

Monir Chowdhury, Ph.D., P.E.
Chief, Planning and Enforcement Branch
